

WEB SITE DEVELOPMENT

We are pleased to announce a new ministry that can develop your church, ministry, or personal web site.

The professional web designers, who are members of fundamental Baptist churches, are eager to please and will guide you through the process. They can help you register your web site domain name and obtain space on a web server, as well as design your actual Internet site.

A standard four-page web site cost only \$100 (plus \$30 for the domain registration and initial hosting fee, over which they have no control). (Each web page contains separate information. For example, one page might contain information about the church services and activities, while another contains information about the church's missionaries, youth ministry, etc.)
